

# Anneewakee Forest Preserve

<b>PROJECT LOCATION</b> Atlanta, GA	<b>PROJECT OPERATOR</b> Georgia-Alabama Land Trust (GALT)	<b>PROJECT TYPE</b> Tree Preservation	<b>CARBON CREDITS</b> 13,906	<b>PROTOCOL VERSION</b> City Forest Credits Preservation Protocol V 11.40
--	--	--	---------------------------------	--

## 13,906 ICROA-Endorsed Carbon+ Credits from Georgia-Alabama Land Trust's Permanent Forest Conservation in the Atlanta Area.

### Value of the Project

Urban growth is projected to add close to 100 million acres of urban land to the United States by 2060. Preserving at-risk parcels near cities delivers critical environmental and social impacts to metro areas. The 185-acre oak-hickory Anneewakee Forest Preserve is situated in the densely populated and growing Atlanta metropolitan area. The 85-year-old forest was zoned residential in a suburban area experiencing rapid residential growth. GALT's protection of this forest ensures green spaces for residents and wildlife in Douglas County. The Preserve will provide easy access to nature for under-resourced communities, enhanced watershed function, and priority habitats. By investing in this project, your company can make a positive impact right in its own backyard.

### Unique Public Interest Credits

These carbon credits are public interest credits – a non-profit land trust preserving a forested natural area as a public resource. Through the generation of these credits, improved air quality, reduced stormwater runoff, and reduced heat will result, while also delivering social equity and human health impacts. CFC credits are endorsed by the prestigious International Carbon Reduction and Offset Alliance (ICROA). Buyers can confidently offset their carbon emissions with a public interest credit while giving back to their local communities. Buyers of CFC credits include PayPal, Dominion Energy, Xcel Energy, City of Austin, and more, all seeking the rare community-based credits issued by CFC.

**185 Acres Preserved**  
Mature Oak-Hickory Forest

**Rain Interception**  
21,391 m<sup>3</sup>/year,  
\$55,949 per year

**Energy – Cooling**  
(electricity)  
221,815 kWh/year,  
\$16,836 per year

**Co-benefits**  
Valued at \$85,582  
per year

## Carbon+ Credits Available for Purchase

The Georgia-Alabama Land Trust developed this project and the credits in compliance with the carbon protocols developed by City Forest Credits, a non-profit carbon registry devoted to urban forest carbon.

These credits represent valuable elements of Atlanta's urban forests – equitable access to greenspace, climate benefits in carbon storage and quantified ecosystem values, and a community resource for health and social cohesion. Proceeds from the credits will fund stewardship and maintenance of the Anneewakee Forest Preserve.

### SUSTAINABLE DEVELOPMENT GOALS

#### Healthy Communities

Improve resident well-being

**13,906 tCO<sub>2e</sub>**

Carbon+ Credits issued and available for purchase

**185 Acres**

Generating \$3.4 million in ecosystem value over 50 years

#### Cooperation and Partnerships

Underpin the project's success
